2003 - HDWA Annual Conference

Albuquerque - October 2 & 3, 2003

Theme: Use of Enterprise Data Warehousing (EDW) to support Decision-Making by leaders and practitioners in Healthcare.

**Sub-Themes/
Priorities:**

- Patient/ member safety and improved quality outcomes
- Learning from one another and getting all attendees closer to the leading edge in healthcare data warehousing
- Open sharing of success and failures with a focus upon accelerating the transfer of lessons learned by practitioners in the field to their colleagues
- Use the conference to build relationships and possibly add to the EDW group

Purpose: Promote shared learning and accelerate adoption of advanced techniques among representatives involved in the application of Enterprise Data Warehousing (EDW) in their healthcare organizations.

Day One - October 02, 2003

Time
