2006 - HDWA Annual Conference

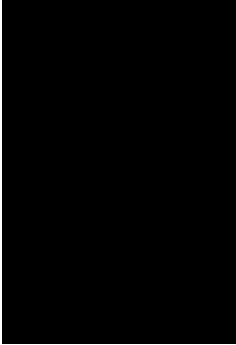

Evolving the Data Warehouse to Improve Healthcare

Where are we? What have we learned? Where are we going?
How do we add value?

October 3 — 4, 2006 (Post Conference October 5)
Hosted by SUTTER HEALTH in Sacramento,
California

The conference includes two days of presentations by HDWA members for HDWA members. The first day of the conference will be an overview of healthcare and data warehousing - a breadth of topics relevant to most people involved in healthcare data warehousing. The second day of the conference will delve deeper into healthcare data warehousing and will have two tracks: technical and business/clinical. All presentations are open to all attendees - you will not be limited to a specific track. The conference will start at 8:30 am and conclude at approximately 4:15 pm.

The post conference is a working session with the opportunity to discuss in depth a topic of interest. See the links on the left for more details on the presentations and

post-conference. The post-conference will start at 8:30 am and conclude at approximately 3:00 pm.

If you plan on presenting, please see the "Call for Presentations" link on the left for details.

Please note: To accommodate for HDWA's planning efforts, it is important for you to register for your rooms by July 14. See the "Registration" link for more detail.
